

## Cruelty Free Products

The development of new food varieties considers only projects that are based on sufficiently researched and recognized scientific principles.

We strictly refuse to carry out animal experiments which would lead to serious interference in the animals or which are associated with pain or suffering.

Of course, we regularly „evaluate“ our food through animals. Dogs and cats have their own taste, just like humans. We conduct so-called „palatability tests“ in order to assess the food. With these tests, we evaluate the acceptance of the food by the animal as well as the food's compatability. The pet owners visually assess the eating behavior (e.g. which food is preferred? Which food is eaten more?), the characteristics of feces, the coat quality, the general development and condition of their animal. Palatability tests are generally carried out by pet owners – either in private households or by breeders. Since every pet owner is, of course, concerned about the wellbeing of their animal, it is evident that these acceptance tests have nothing in common with the aforementioned animal experiments.

## HAIR & SKIN

FOR ADULT, PUREBRED CATS

ESSENTIAL FATTY ACIDS

4% SALMON + 34% POULTRY + 9.5% LIVER

WITHOUT CEREALS CONTAINING GLUTEN\*

The high content of valuable oils and fats (including 1.5% salmon oil) in our Chicopee Hair & Skin can support an elegant, shiny and supple coat. The combination of vitamins and trace elements that support a healthy skin and coat makes it especially suitable for pedigree cats. The addition of 9.5% liver (fresh & dried) ensures an extraordinary taste sensation. Salmon (4%) is a valuable source of omega fatty acids, contains high levels of protein with a high biological value and is easily digested.

Poultry (fresh and dehydrated, 34 %), rice flour, rice (14 %), liver (fresh and dehydrated, 9.5 %), animal fat, salmon meal (4 %), hydrolysed protein, greaves (dehydrated), dried beet pulp (sugar removed), linseed, salmon oil (1.5 %), pea fiber, peas (dehydrated, 0.5 %), calcium carbonate, yeast (dehydrated), powdered egg, potassium chloride, cranberry (dehydrated, 0.1 %), blueberry (dehydrated, 0.1 %), mannan oligosaccharides (0.1 %), green-lipped mussels (dehydrated), beta-glucans (0.06 %), blooms of marigold (dehydrated), chicory powder, yucca (dehydrated).

PACKAGING SIZES:

1.5 KG 8.0 KG

## NO GRAIN

FOR GROWN, NUTRITIONALLY SENSITIVE FELINES

VITAMIN E, SELENIUM & ZINC

43% POULTRY + 9.5% LIVER

NO GRAIN\*\*

Our Chicopee No Grain is made with a high percentage of poultry (43% - fresh & dried) and no cereals. Poultry is a particularly easily digestible and high-quality source of protein. As a highly digestible source of carbohydrates we use fresh potatoes and peas. Allowing you to feed your furry friend gently and grain-free. Especially beneficial for nutritionally sensitive kitties with pronounced cereal intolerance. The addition of 9.5% liver (fresh & dried) ensures an extraordinary taste sensation. Vitamin E, selenium and zinc to support the natural defences of your four-legged friend. All three compounds are antioxidants and can reduce the level of free radicals in the body.

Poultry (fresh and dehydrated, 43 %), potato flour (17.5 %), potato starch, liver (fresh and dehydrated, 9.5 %), hydrolysed protein, animal fat, dried beet pulp (sugar removed), linseed, pea fiber, greaves (dehydrated), salmon oil, powdered egg, fish meal, peas (dehydrated, 0.4 %), calcium carbonate, yeast (dehydrated, 0.25 %), cranberry (dehydrated, 0.1 %), blueberry (dehydrated, 0.1 %), green-lipped mussels (dehydrated), mannan oligosaccharides (0.1 %), beta-glucans (0.06 %), blooms of marigold (dehydrated), chicory powder, yucca (dehydrated).

PACKAGING SIZES:

1.5 KG 8.0 KG

## STERILIZED

FOR GROWN, CASTRATED & OVERWEIGHT FELINES

REDUCED ENERGY CONTENT

43% POULTRY + 9.5% LIVER

NO GRAIN\*\*

Our Chicopee Sterilized is a complete food supplement for nutritionally sensitive kitties that are prone to overweight due to castration. Neutered cats need energy-reduced feed with a lot of fibre (raw fibre), which causes a good repletion and sustainably avoids weight gain (weight control). This relieves the joints and bones of your furry friend.

Our Chicopee Sterilized is made with a high percentage of poultry (38% - fresh & dried) which is a particularly digestible and high-quality source of protein. The addition of 9.5% liver (fresh & dried) ensures an extraordinary taste sensation. Simply delicious!

Poultry (fresh and dehydrated, 38 %), potato flour (16.5 %), potato starch, liver (fresh and dehydrated, 9.5 %), dried beet pulp (sugar removed), hydrolysed protein, pea fiber, cellulose fibres, greaves (dehydrated), linseed, salmon oil, powdered egg, fish meal, peas (dehydrated, 0.4 %), yeast (dehydrated, 0.25 %), calcium carbonate, potassium chloride, cranberry (dehydrated, 0.1 %), blueberry (dehydrated, 0.1 %), green-lipped mussels (dehydrated), mannan oligosaccharides (0.1 %), beta-glucans (0.06 %), blooms of marigold (dehydrated), chicory powder, yucca (dehydrated).

PACKAGING SIZES:

1.5 KG 8.0 KG

## URINARY

FOR GROWN FELINES WITH SENSITIVE URINARY TRACTS

REDUCED PROTEIN & MINERAL CONTENT

25% POULTRY + 9.5% LIVER

WITHOUT CEREALS CONTAINING GLUTEN\*

Our Chicopee Urinary is particularly suitable for all older kitties that have sensitive urinary tracts. The reduction of proteins and minerals (low protein) minimizes the urinary degradation products and therefore relieves the kidneys and urinary organs of your furry friend. The formation of urinary stones is effectively prevented. In our Chicopee Urinary we deliberately avoid gluten-containing cereals (including wheat). That is why this complete food is particularly suited to cats with sensitive stomachs. We use easily digestible carbohydrate sources such as rice and peas in our formula. And the addition of 9.5% liver (fresh & dried) ensures an extraordinary taste sensation.

Poultry (fresh and dehydrated, 25 %), rice flour, rice (14 %), animal fat, liver (fresh and dried, 9.5 %), greaves (dehydrated), dried beet pulp (sugar removed), hydrolysed protein, pea fiber, potato protein, calcium carbonate, cellulose fibres, peas (dehydrated, 0.7 %), salmon oil (0.7 %), linseed, fish meal, powdered egg, yeast (dehydrated, 0.24 %), potassium chloride, cranberry (dehydrated, 0.1 %), blueberry (dehydrated, 0.1 %), mannan oligosaccharides (0.1 %), green-lipped mussels (dehydrated), beta-glucans (0.06 %), blooms of marigold (dehydrated), chicory powder, yucca (dehydrated).

## Holistic - Nature - Line

Chicopee HNL are special products that are also suitable for nutritionally  
sensitive cats.

Extra additional benefits of this product line, for example urinary stone  
prevention, the improvement of the fur properties or the effective weight control  
in castrated cats provide the optimal solution for the specific characteristics  
of your feline friend.

Special Plus: *Veterinarian approved*

The scientific formulations of our „Holistic-Nature-Line“ products provide your velvet  
paw the optimal supply of the most important vitamins, minerals and trace elements.
